Maarif Ajandası

Every school document, written in minutes

Learning outcome tracking, the class timetable and official document writing in one app. Production forms fill themselves from the school, name and subject in your profile.

TOOLS
6 AI tools

CONTEXT
Level and subject

OUTPUT
Word · PDF · Slides

Activity

Activity Suggestion

Presentation

Create Presentation

Exam

Create Exam

MODULE MAP

Eight modules, one app

AI Studio

Activity, presentation, exam, daily plan and minutes; five AI tools on one screen.

- Activity Suggestion — From a learning outcome
- Daily Plan — Method and assessment
- Create Exam — Word document

Learning Outcomes

Ministry learning outcomes; grades 1-12, week by week.

1-4 | 5-8 | 9-12

My Class & Tools

Attendance, duty roster, optical forms, exam analysis, extra hours and official charts.

Optical | Duty | Extra hours

Documents

Every document you produce is kept in one place.

- Department minutes
- Exam paper

Special Education

IEP Wizard and special education assessment forms.

IEP | RAM

BİLSEM

Guide for Science and Art Centre teachers; enrichment content.

BYF | ÖYG | Project

Class Timetable

Weekly timetable, read from a photo of the chart at school.

Mon | Tue | Wed | Thu | Fri

Calendar

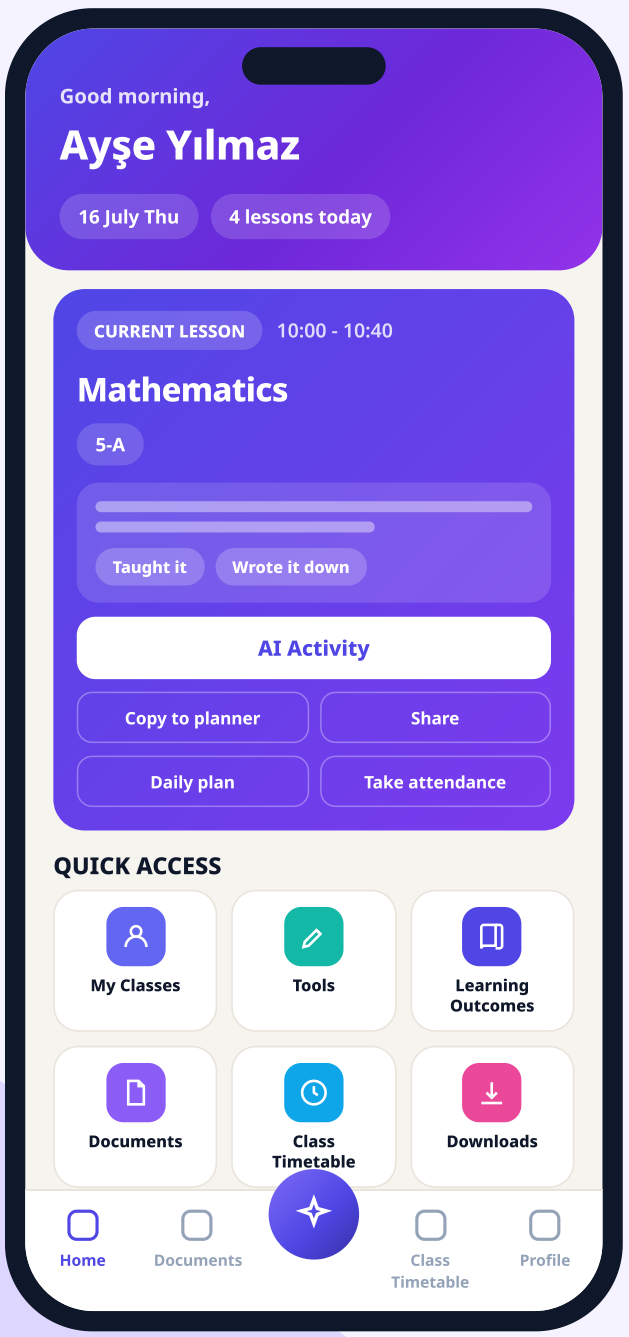

Academic calendar, special days and weeks, competition calendar.

Today — 4 lessons

HOME

Today's lesson at the top of the screen

When the app opens, the current lesson, its time and its class are right there. From the same card you produce an activity, copy the lesson into your planner and take attendance.

From the current lesson card

4

AI Activity
An activity matching the week's learning outcome is produced.

Daily plan
Daily plan production starts from the same lesson.

Copy to planner
The lesson goes into the planner, you do not type it again.

Take attendance
The class attendance register opens.

What it says when there is no lesson

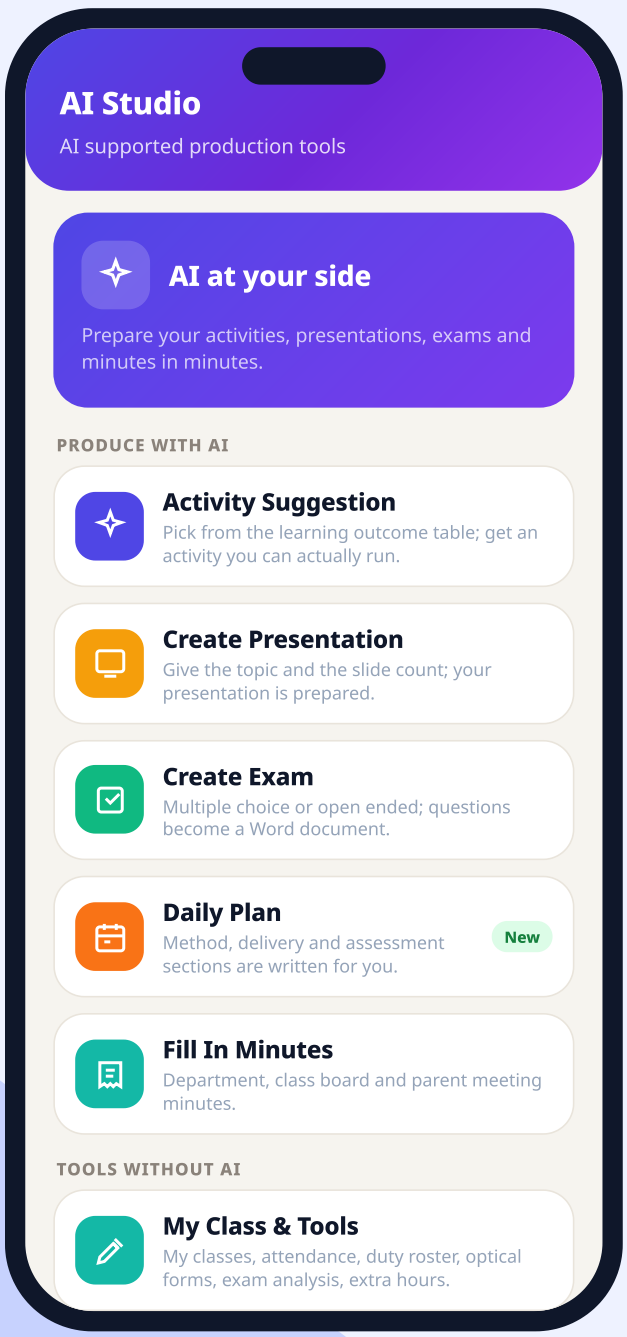

- Enter your class timetable
- No lessons today
- Have a good weekend!
- Today's lessons are done

The week's learning outcome also sits inside the card; it is tracked with the **Taught it** and **Wrote it down** marks. The star button in the middle of the bottom bar opens **AI Studio** directly; it is the app's signature element.

AI STUDIO

AI supported document writing

Five production tools and one tool centre. Each tool opens its own form and the output arrives as a document you can download.

What each tool produces

Document

Activity suggestion

Tied to the selected learning outcome, ready to run in class.

Lesson presentation

Slide by slide, from the topic and slide count you give.

Exam paper

Multiple choice or open ended questions, as a Word document.

Daily plan

Method and delivery from the lesson, topic and learning outcome.

Meeting minutes

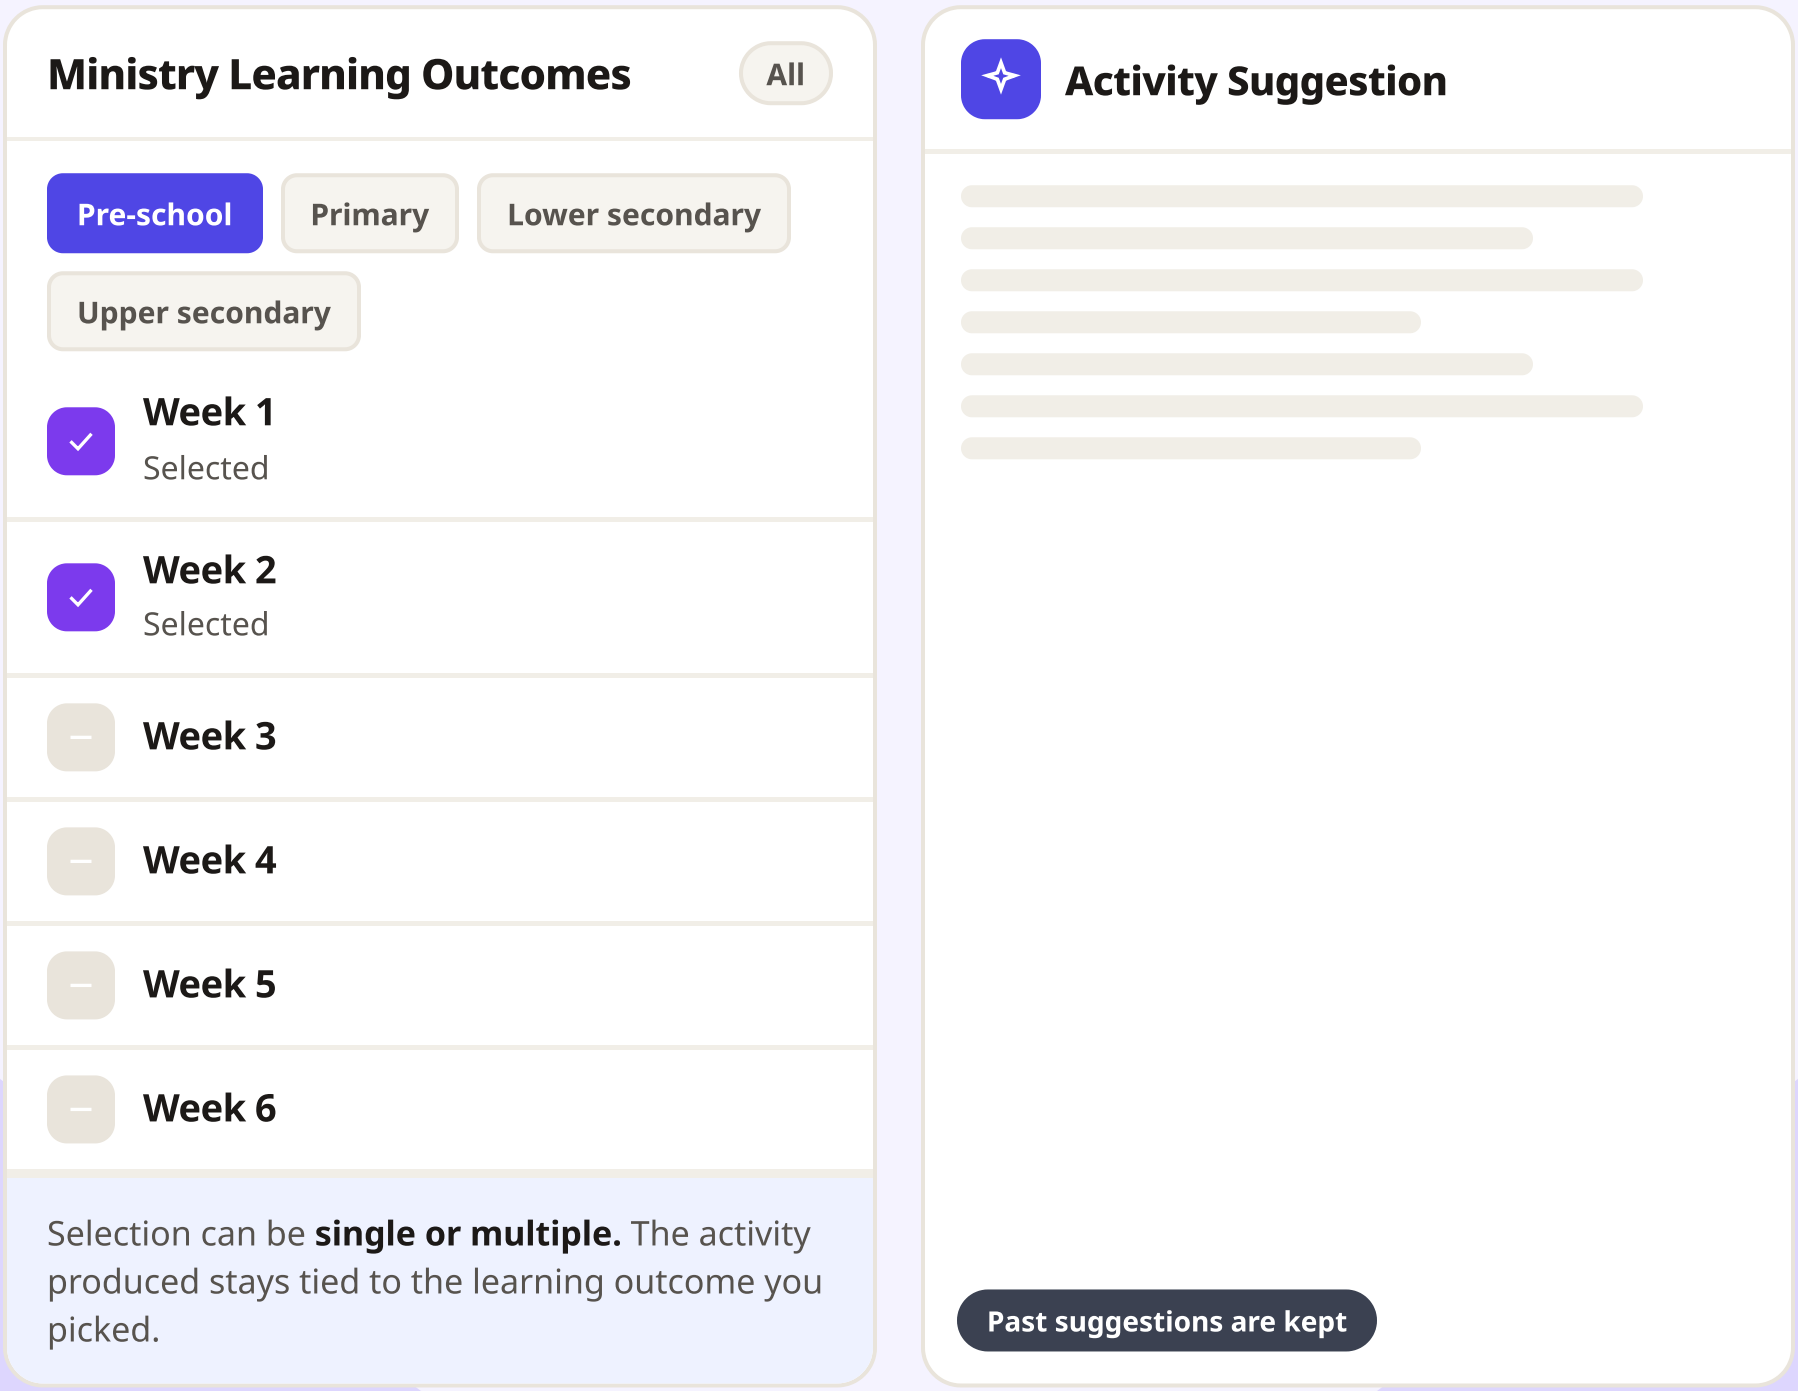

With the agenda and the decisions, in official form.

Production forms are filled automatically from the **school, name and subject in your profile.** Browsing is always free; the AI tools open with **Premium** membership.

LEARNING OUTCOMES

From a learning outcome to an activity in one step

Ministry learning outcomes are listed week by week for grades 1-12. Select one or several from the table; an activity suggestion that fits your class is produced.

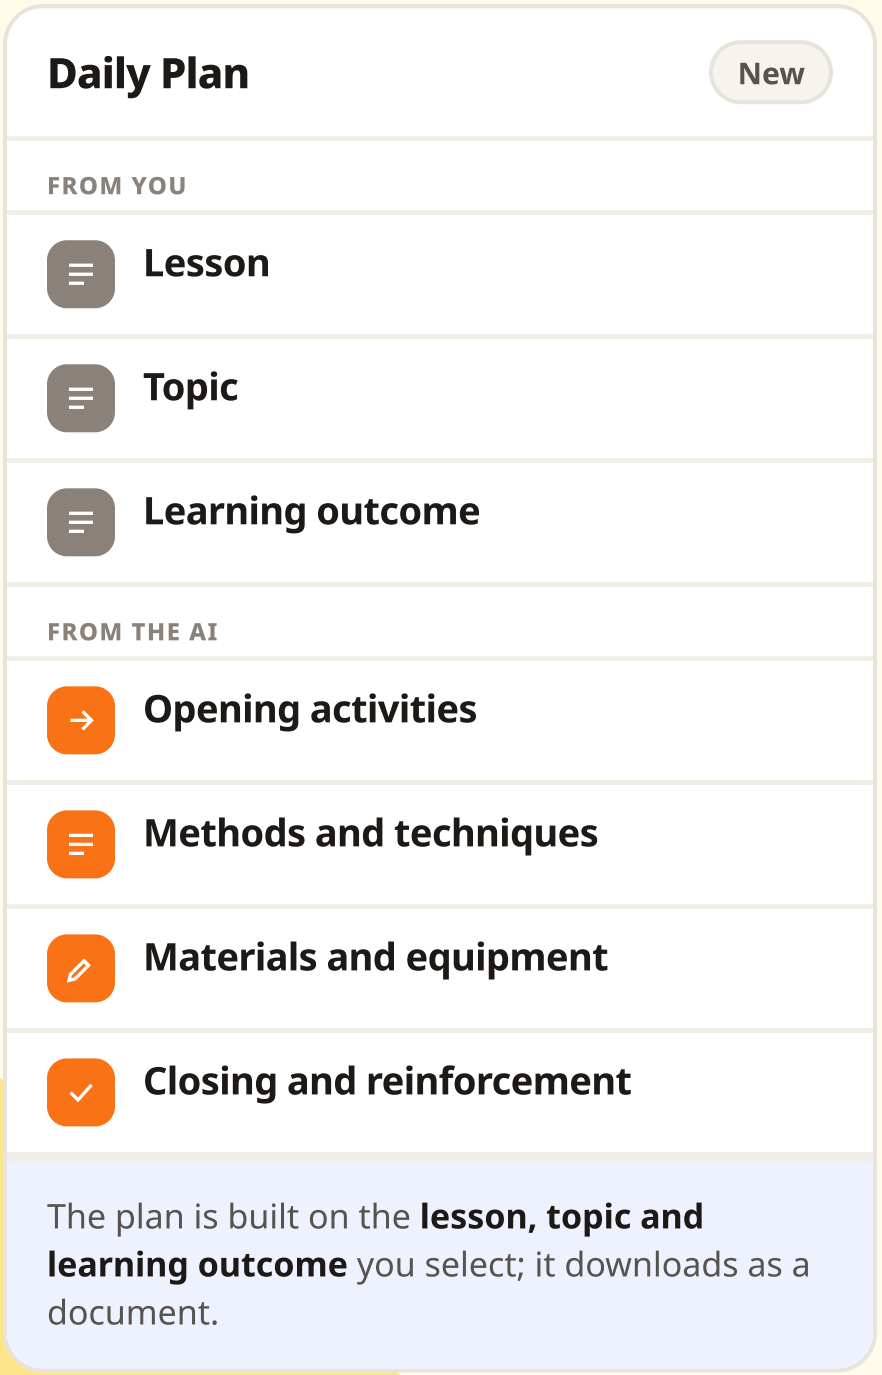

Every suggestion stays in **Activity Suggestion History.** For the same outcome you continue where you left off instead of producing it again.

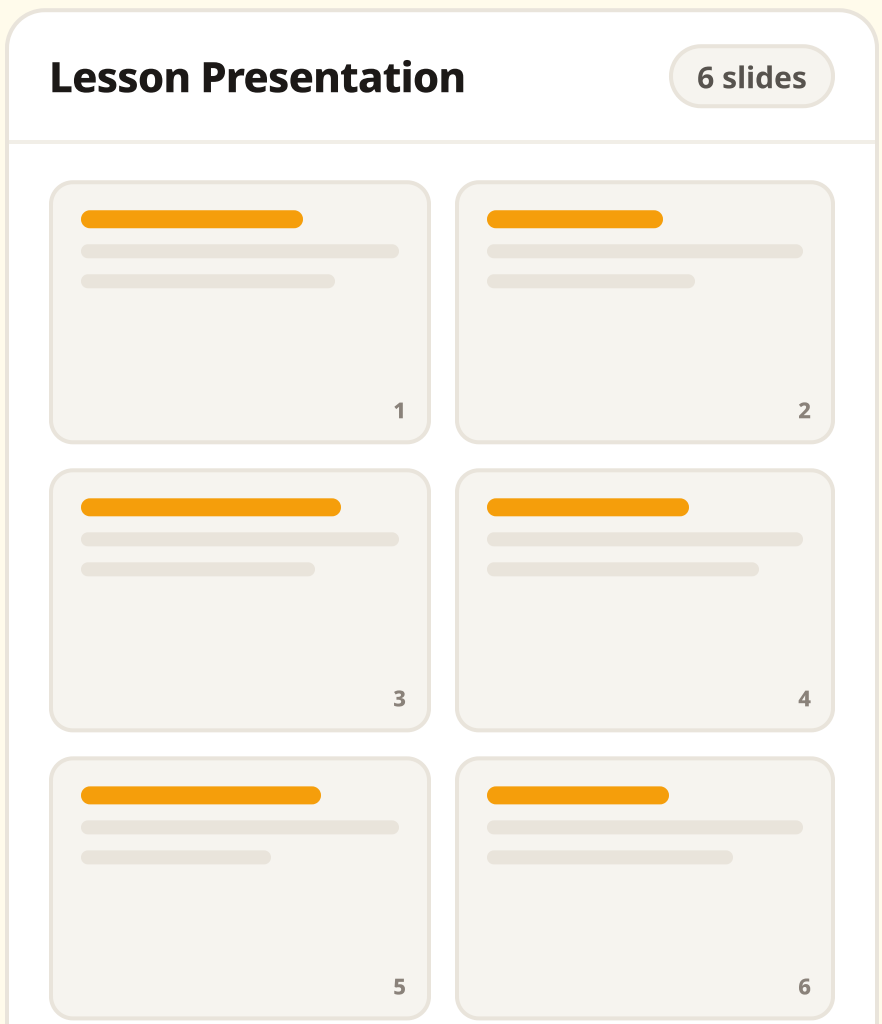

DAILY PLAN AND PRESENTATION

The sections of the plan fill themselves

Enter the lesson, the topic and the learning outcome; the method, delivery and assessment sections are written. The same topic also becomes a slide by slide presentation.

The plan is built on the **lesson, topic and learning outcome** you select; it downloads as a document.

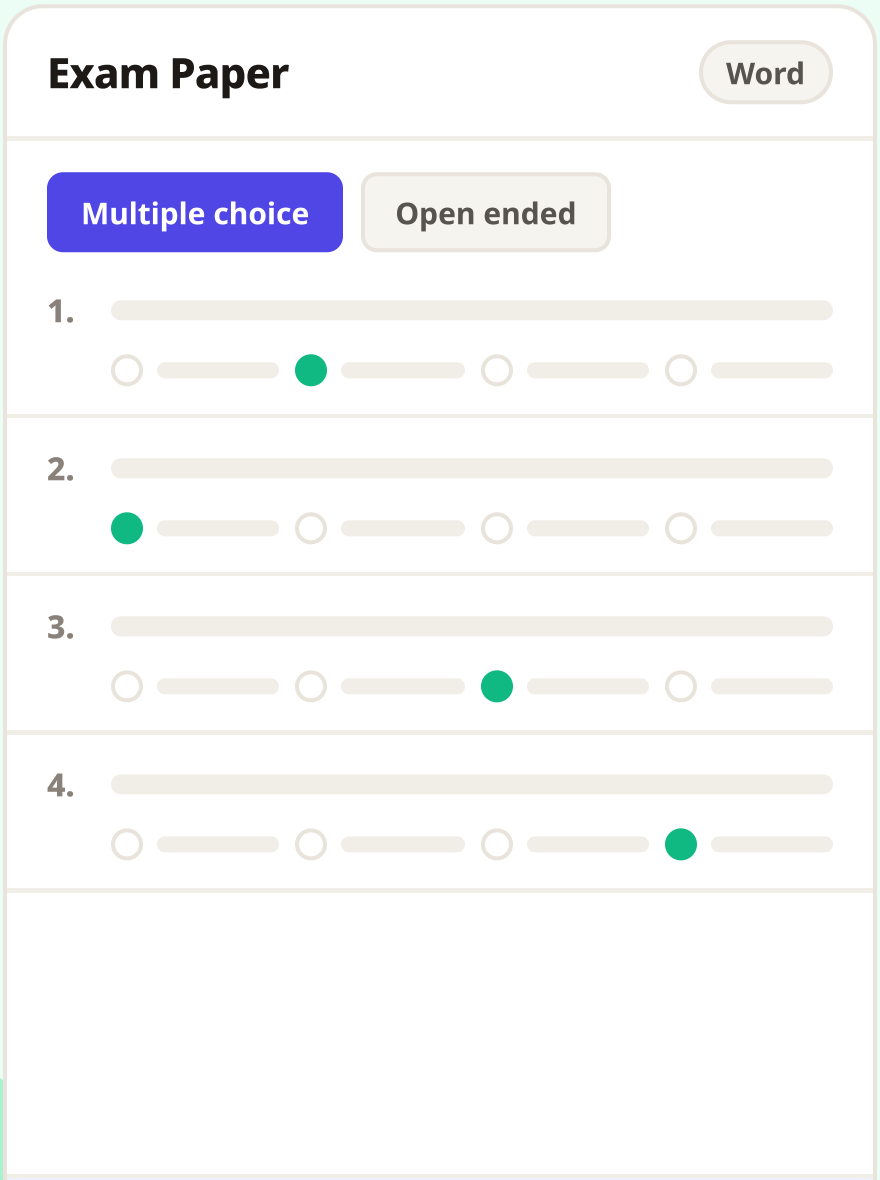

The topic and the **slide count** come from you; the slide content comes from the AI.

The web version is designed for interactive whiteboards: you project the presentation you prepared from the same screen in class.

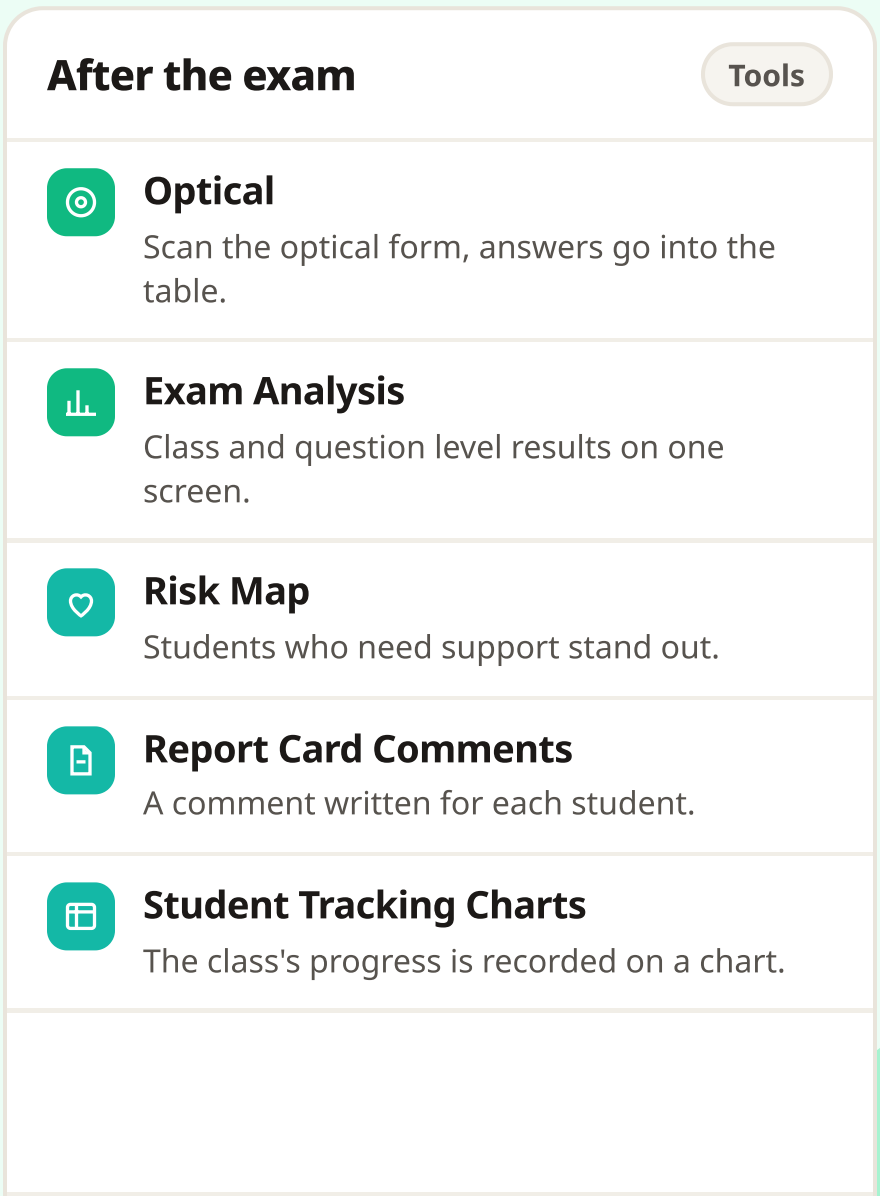

CREATE EXAM

Multiple choice or open ended, output is Word

Questions are produced for your subject and turn straight into a Word document. Optical reading and exam analysis are in the same app; you scan the answer sheets and get the class table.

Questions are produced for **your subject.** The document lands in Documents and the file you download stays in Downloads.

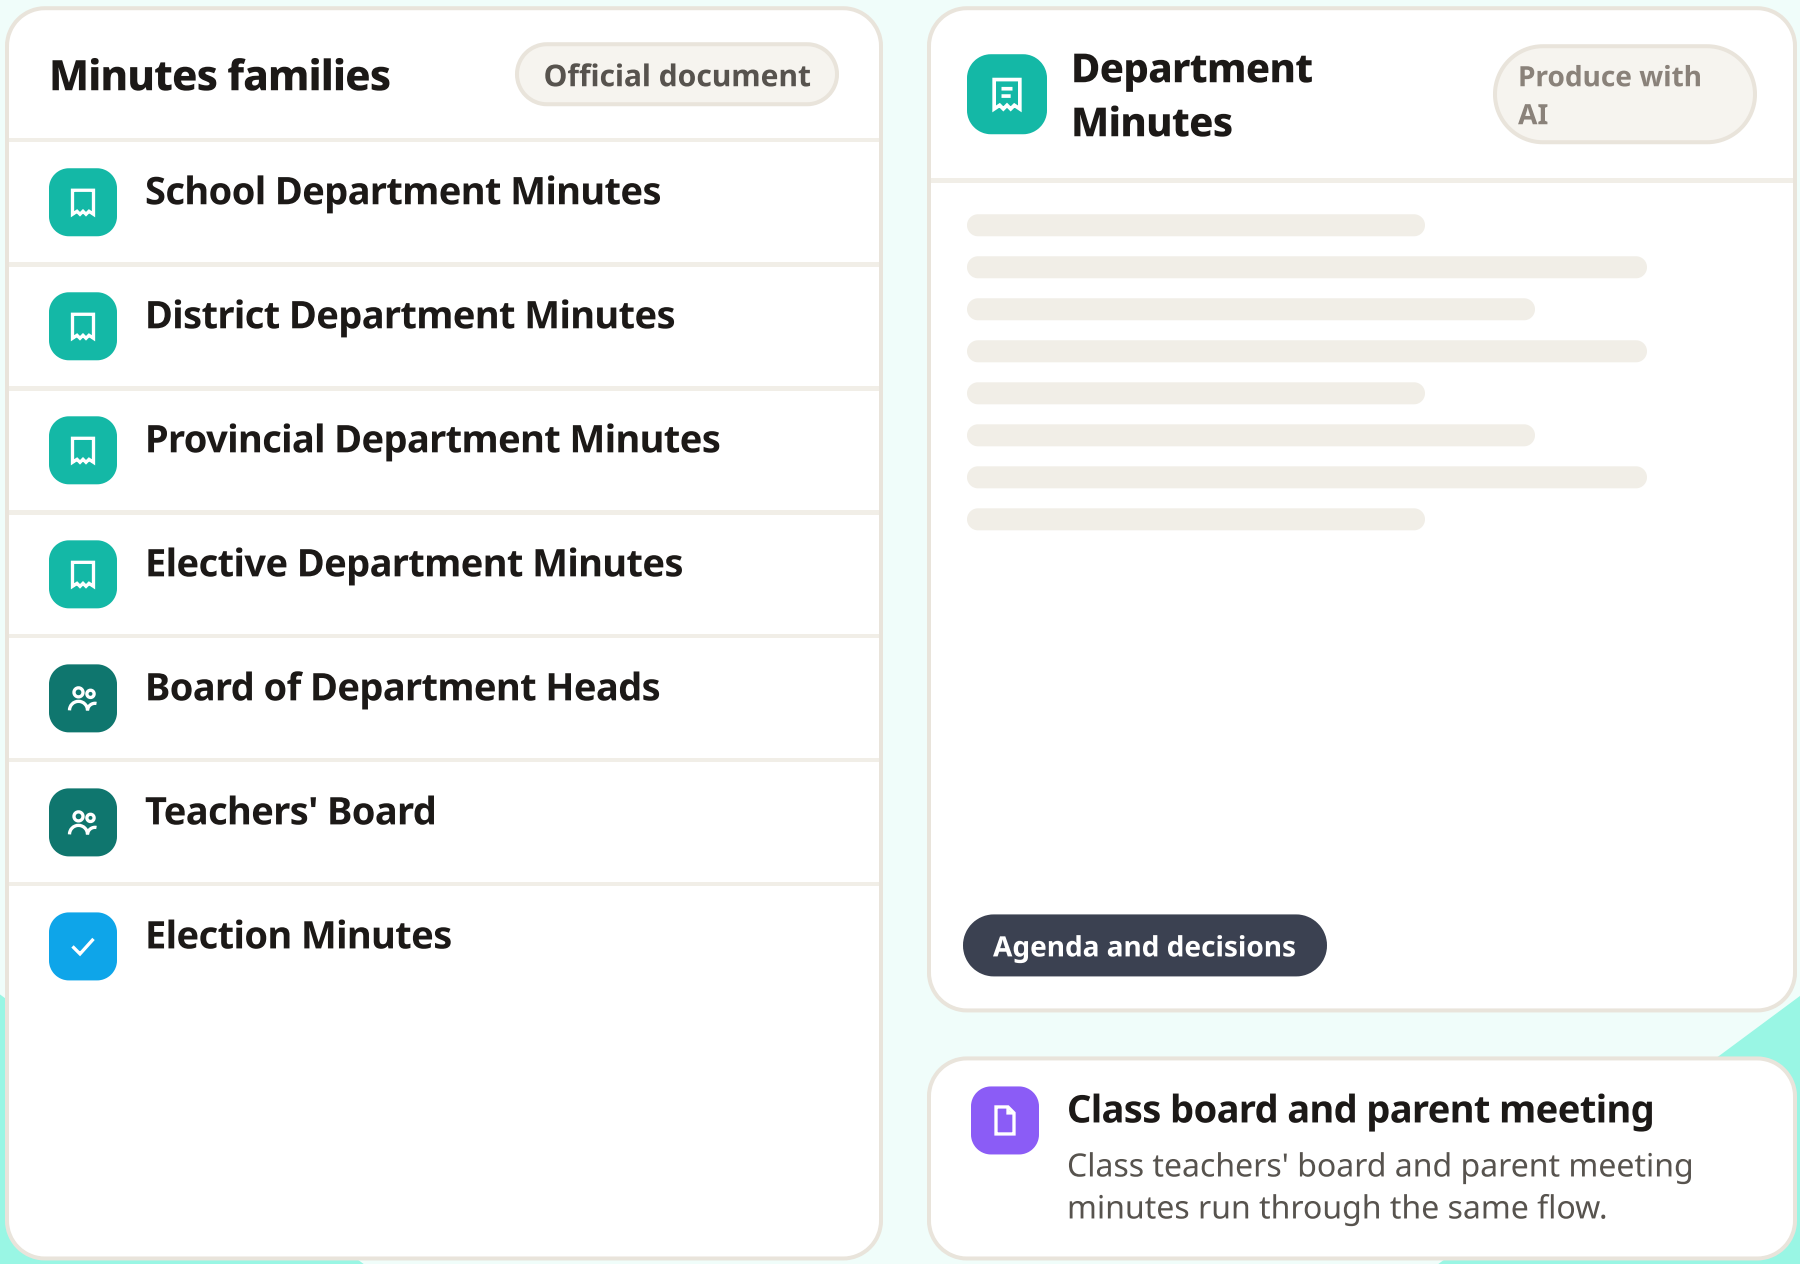

These tools use no AI; they are gathered in the **My Class & Tools** centre.

If the class list is empty the table comes with blank rows; you can enter students later.

FILL IN MINUTES

From department to board, minutes ready

The AI writes the agenda and decisions of department, class board and parent meeting minutes. School, district and provincial department minutes and board minutes are held separately.

The document header (school name, teacher name, subject) comes from **your profile.** A missing header warning appears before production.

MY CLASS AND TOOLS

From attendance to optical, the whole class workload

The daily work that needs no AI, in one centre. Charts, official forms and calculators; all of them arrive filled with your profile details.

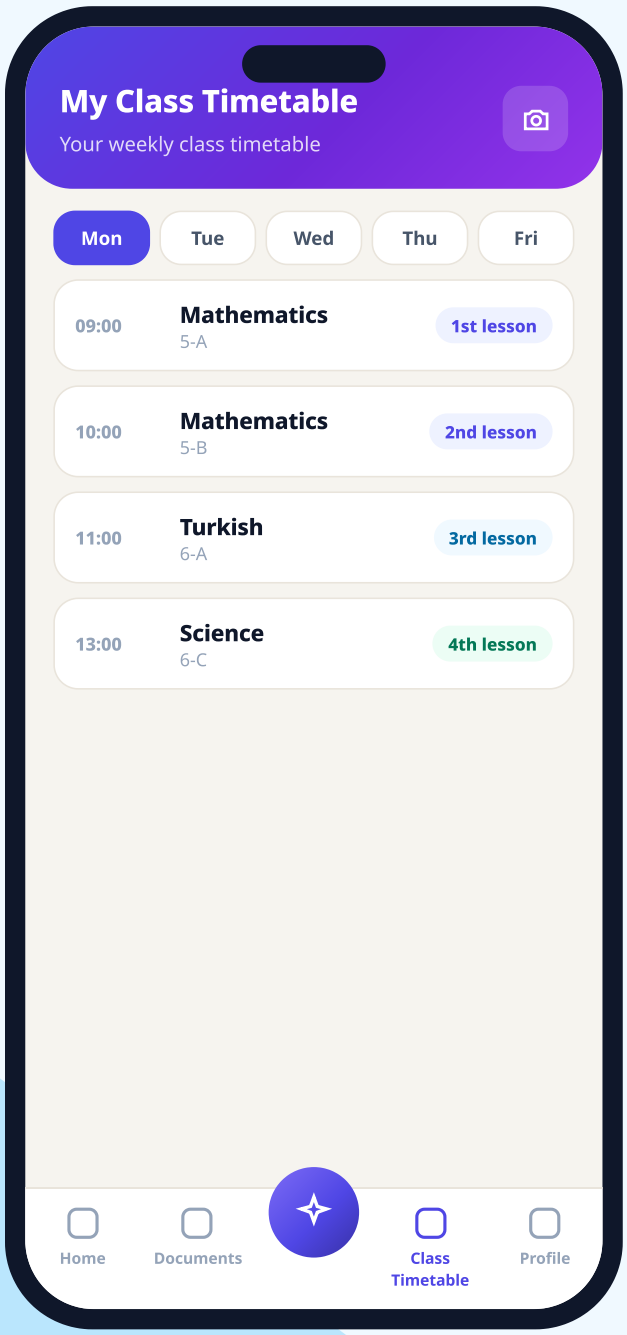

- **My Classes**
- Attendance Register
- Duty Roster
- Class Duty List
- Optical
- Exam Analysis
- Seating Plan
- Class Draw
- Student Tracking Charts
- Risk Map
- Student Profile File
- Parent Communication Documents
- Absence Letter
- Report Card Comments
- Extra Hours Calculation
- School Starting Age
- Support Course File
- Workplace Monitoring Form
- Exercise Programme
- Student Club Document
- Candidate Teacher File
- Petition Library
- School Trip File
- Ready-made Materials
- Pre-school Activities

The menu also holds **Lessons**, **Books**, **My Favourites**, **Academic Calendar**, **Special Days and Weeks** and **Competition Calendar** as well.

CLASS TIMETABLE

Import the timetable from a photo

Take a photo of the chart on the school wall; the app reads the lessons and you only check them. Once the timetable is in, the home screen finds the current lesson by itself.

Import from a photo

3 steps

Take the photo
A photo of the chart at school is enough.

Review the timetable
Edit the lessons read from the photo.

Enter the lesson details
Complete what is missing and the timetable is ready.

Calendars

4

- **Calendar**
- **Academic Calendar**
- **Special Days and Weeks**
- **Competition Calendar**

The planner, the class timetable and document records are also kept on the device; if the connection drops you keep seeing your records.

SPECIAL EDUCATION MODULE

IEP Wizard and assessment forms

A guide for special education and RAM teachers. Build the individualised education programme step by step; assessment and monitoring forms are produced in official form.

Special Education Module

Document

- **IEP Wizard**
  The individualised education programme is built step by step.
- **Initial Assessment Form**
- **Educational Assessment Request Form**
- **Behaviour Change Programme**
- **IEP Monitoring and Assessment Form**
- **End of Term Performance Form**
- **Special education department minutes**

Who it is for

- **Special education teacher**
  "Special Education" can be picked from the subject list.
- **Special Education School or Centre**
  Once the institution type is set, the module appears in the menu.
- **Guidance and Research Centre**
  First Review and Re-review flows for RAM.

The module opens according to the **institution type** in your profile; a teacher it does not concern never sees it.

A subject teacher with an inclusion class reaches the same forms; documents arrive filled with the school name and the teacher's details.

☆ BİLSEM AND PROFILE

Modules that open for your institution

Your profile is the context of everything produced: school level, subject, title, administrative role and institution type.

BİLSEM Module — Enrichment

- **Adaptation Programme**
- **Support Education Programme**
- **Individual Talent Awareness Programme**
- **Special Talent Development Programme**
- **Project Production and Management Programme**
- **BİLSEM department minutes**

Identification announcements and current BİLSEM news are in the same module.

Profile, the context of production

SCHOOL LEVEL

Pre-school · Primary · Lower secondary · Upper secondary

INSTITUTION TYPE

State school · **BİLSEM** · Special Education · RAM · Public Education · Vocational Education

ADMINISTRATIVE ROLE

Head teacher · Senior deputy head · Deputy head

The subject list comes from the **Ministry's appointment fields.** Anything not on the list is entered as free text.

The teaching title is kept in the profile as well: **Teacher**, **Specialist Teacher**, **Head Teacher.** At upper secondary level the school type is asked separately and feeds into production.

Browsing is free. The planner is in your pocket.

The app is live on Google Play. The planner, the class timetable, the learning outcome lists and the ready-made documents are free to use; AI production opens with Premium.

- **Every teacher from pre-school to upper secondary**
- **Administrative tools for head teachers and deputy heads**
- **Separate modules for BİLSEM, special education and RAM**
- **Documents download and print as Word and PDF**
- **The web version runs on interactive whiteboards**
